Re: Renewable Energy Source Eligibility Application for PSNH Energy Park Solar Photovoltaic (PV)
Installation

Dear Ms. Howland:

Please find enclosed the original and electronic version and six copies of Public Service Company of New Hampshire's (PSNH) application for determination of eligibility to acquire Class II renewable energy certificates consistent with the New Hampshire Public Utilities Commission Renewable Portfolio Standard (Puc 2500).

PSNH installed a new 51.315 kW DC solar photovoltaic customer-sited generation system at PSNH's corporate headquarters at 780 North Commercial Street, Manchester, NH. PSNH requests that this system be eligible to acquire Class II Renewable Energy Certificates.

Also included is a written request under Puc § 201.05 for a waiver of the requirements for an Independent Monitor. PSNH proposes to read its own meter and report to the Commission and the NEPOOL Generator Information System (GIS) system.

Please consider this application and contact us if you need additional information.

Sincerely,

Gerald M. Eaton
Senior Counsel
